Suspicious

Normal

LLM Summary

Mini SentryAI+ detected a series of events:

- * From frames 21-31, the system detected a "helmet" with moderate confidence (YOLO: helmet (0.46-0.66)) but the action was classified as "normal" (I3D: normal (0.00)). This resulted in a "suspicious" severity rating.
- * From frames 41-57, the system detected a "robbery" with moderate to high confidence (I3D: robbery (0.45-0.75)) with no other object detections. This resulted in a "danger" severity rating.
- * From frames 60-62 and 84-85, the system detected a "knife" with low confidence (YOLO: knife (0.41-0.45)), and the action was classified as "normal" (I3D: normal (0.55-0.87)). This resulted in a "suspicious" severity rating.

Event Frame: 21

YOLO Detection: helmet (0.59)

I3D Prediction: normal (0.00)

Final Severity: suspicious
